Advance is not enough

Safety is our ultimate concern. That is why Advance Aviation opted to buy brand new twin engine helicopters that integrate Eurocopter's latest technologies and design. Not only that our aircrafts are flown by highly experienced pilots, accumulated over 6,000 flight hours, but they will be maintained daily by experienced Eurocopter's personnel in the facility specially set up in Thailand to ensure maximum maintenance quality. Whether it's a business, holiday or simply casual ride, Advance Aviation offers a specially tailored arrangement to best suit your desire with ultimate VIP treatment.

Where Sky And Safety Meet

www.advanceaviation.co.th

ADVANCE VIATION Established in December 2006, it was intended for the founder's father, one of the few most prominent VIP in Thailand, and the 2 founders' private use. With 100% equity (no borrowing) the company can operate without financial constraint to ensure highest safety and quality of services. With strong interest among corporate VIPs, Advance Aviation has become the only full time VIP helicopter operator in Thailand. We have purchased a new EC 135, and ordered another one for 2008 delivery. The company's business plan is to have at least 3 helicopters, all new, by the end of 2009. Still, the company is committed to the same highest quality and safety since its inception.

CALL CENTER +66(0)85-055-4444

499 Benchachinda Bldg., 14A Vibhavadi Rangsit Rd. Ladyao Chatuchak Bangkok 10900, THAILAND

Safety AAviation

EC 135 has 2 powerful and reliable Pratt & Whitney engines, both feature Full Authority Digital Engine Control (FADEC) for optimized engine operation and safety, provide outstanding performance and vital power reserves even in one-engine-inoperative scenarios. State-of-the art avionics considerably reduce the workload of the pilot allowing him to focus on the mission. Though the aircraft is officially certified for single pilot operation, we usually assign 2 pilots to navigate you around.

CALL CENTER 085-055-4444

Comfort & Prestige AAviation

Whatever the task, the twin engine EC 135 meets it in a professional manner. The helicopter's hingeless, bearingless main rotor combined with 4 bladed and innovative Fenestron® tail rotor system offer a very quiet (quietest in its class), exceptionally smooth and fast ride. And when it comes to accessibility, the oversized side-sliding doors enable passengers to easily board and exit. In addition, the helicopter's rear clamshell doors make luggage storage ample and simple. The EC 135 offers unsurpassed external visibility during flight, offering passengers an extraordinary view. Lavishly decorated interior with 5 VIP seats each equipped with Bose® noise cancellation headset, air conditioned cabin, ensure a pleasant and restful atmosphere for the travelers.

Flying AAviation

Advance Aviation offers a specially tailored arrangement that best suits your desire. We can pick you up from over 20 roof-top helipads in the heart of Bangkok and drop you off at over 100 landing sites in Thailand. With our flying range of over 630 km at the speed in excess of 250 km/hr., we can fly you to almost anywhere, over the land or water, and cater everything to your special needs including waiting to bring you back. For example, a simple hop from your office in Bangkok to Hua-Hin can take only 35 minutes in the air.

For international arrival, we pick you up right when you step out of your plane, taking you through Immigration, Customs, and luggage handling, directly to our helicopter. Special services such as police escort for qualified VIP and dignitaries, armored car, coordinating exclusive hideaway such as villa or retreat is also available upon request.
