

## Mega Power #15 Engine Oil Systems Cleaner

**Cleans, Coats, and Provides  
Advanced Engine Protection**

**Product Description:** An advanced chemical technology carefully balanced to help clean and protect internal engine surfaces with a low-friction lubricating film.

- ~Great for older or higher mileage vehicles that need internal cleaning and extra lubrication.
- ~Effectively solvates engine sludge deposits, improving oil circulation.
- ~Coats metal surfaces with friction-reducing film.
- ~Helps extend the life of engines and power train components.
- ~Protects against wear on cold starts.

Mega Power #15 Engine Oil Systems Cleaner is designed to be added to the crankcase of an engine at operating temperature. The engine should then be run for 3-10 minutes at idle speed, then shut off. The oil should then be changed and a new filter installed. The #15 will remove engine sludge and leave a thin, tough lubricating film of MC+ on critical load bearing engine surfaces to reduce wear and improve engine smoothness and performance.
